NEW SCIENCE BLDG. PROPOSED

Homecoming Dance Held December 20

Soft music filled the dimly lighted ballroom of the General Oglethorpe Hotel setting the stage for the 1956 Homecoming Dance of Armstrong College on December 20.

The ballroom, beautifully decorated in holiday motifs, made the perfect setting for the crowning of our king and queen. The newly crowned king is Mr. Reginald C. Haupt. Bubba, as he is commonly known around school, is a member of the Geechee basketball team and an excellent student. Our new queen is Miss Beverly Hersey, who is quite active in student activities and is very popular among the students. Members of the court were misses Suzanne Malone, Sharon Peters, Joyce Krenson, and Harriet Sapp.

The male portion of the court was composed of Messrs. Billy Fox, P. R. Easterling, Guy Platt, and Roddy Guerry. All of the members of the court are outstanding students and are active in student affairs besides being well-liked by their fellow class members.

The new royalty was crowned by last year's king and queen, Dick Adams and the very charming Dottie Baxley. Ex-king Adams looked very reluctant in giving up his crown to the new king.

The receiving line, headed by President and Mrs. Hawes, welcomed the many guests to this gala occasion.

Music was furnished by the well-known Dixie Gamecocks.

Presbyterian Club Is Proposed

There are clubs for students of practically every denomination. It seems though that the Presbyterians are neglected.

If these students are interested, their aid is being sought in the formation of a Westminster Fellowship. Contact Patty Beiser as to the time and place for the first meeting.

Mr. Casper Resigns Faculty Position

Mr. Arthur W. Casper, one of the most popular professors on the Armstrong scene, recently announced his resignation from the faculty of the college.

Mr. Casper graduated from Beloit College in 1940 and was employed by the Central Scientific Company of Chicago and the Perfex Corporation in precision optical work. In 1942 he enlisted in the Army Reserve Corps and studied electronics at the University of Chicago. In 1943 he served on active duty in the Army as a radar technician.

In February of 1946, Mr. Casper married Miss Mary Hinely of Savannah. Mrs. Casper is an Armstrong graduate. Mrs. Casper later became a graduate student at the University of Wisconsin where he obtained his masters in math. He continued his graduate work at the University of Georgia, where he obtained a masters degree in physics.

Mr. Casper is a member of the American Association of Physics Teachers, the American Institute of Physics, Sigma Pi Sigma, Phi Beta Kappa, the Georgia Academy of Science, and Sigma Xi. He was a cum laude graduate.

Mr. Casper is now a member of the technical staff of General Electric

DR. VICTOR REVEALS PLAN

At a recent meeting of the Student Senate, Dr. Irving Victor, a graduate of Armstrong and prominent Savannahian, revealed the latest project of the Armstrong alumni organization. The project, that of obtaining a new science building for the college, is one of the most important suggestions broached to the students in recent years.

The implications of the proposed building are obvious. It would mean a more expandable science program, greater space, and more teaching facilities. Since nearly all major curriculums require courses for graduation, the new facilities would benefit practically every student.

It was pointed out that Armstrong has only eight class rooms which were built for this purpose. The other rooms serving as class rooms were not intended for their present use; many are former studies and guest rooms.

At the last student assembly Dr. Victor told the group of his plan for obtaining funds for this tremendous project. He stated that a large sum of money has already been set aside for this purpose but cannot be used until the school raises an even larger sum to match it. Dr. Victor suggested that the students speak to their parents and neighbors about the project to arouse interest. The students might later be asked to collect money to be applied to the building. Jerry Muller, president of the Sophomore class and Student Senate, expressed the students' desire to co-operate in every way possible in this matter.

Corporation in Cincinnati, Ohio, where he is doing research on the problem of shielding. "The shielding problem" refers to the protection of crews flying nuclear propelled aircraft.

THE INKWELL

The Inkwell is the newspaper of Armstrong College of Savannah published bi-monthly by students of the College.

Personal & Social Growth Thru Higher Education

Personal growth refers to the process by which the college student becomes broadened by self knowledge, growth of character, and mastery of time. Personal growth of an individual is distinguished from educational growth in several respects. Personal growth does not stem directly from contact with the college professor or the numerous texts which the student reads; it is the easily overlooked personality development that arises as a co-product of the educational institution.

The university student is often heard proclaiming the fact that to him the self knowledge arising from his educational pursuits is as important to him as the professional or vocational training he acquires. Higher education may, then, lead the student to a better understanding as well as realization of his goals in life.

Self knowledge is one of the most valuable assets a person can acquire in life. Numerous cases exist in which young people have entered college with no goal or plan for the future. They may have entered some unit of higher education simply to delay the day when they would have to go out into the world on their own. In such cases a better understanding of the thing we call "self" may mean the difference between a full life and a life half lived. It may give those young people with purpose an understanding of what they really want.

Self knowledge gives the young a stake in the future. It makes them realize their resources and is the difference in most lives between being all we are capable of and being less than we might be.

In addition to growth of self knowledge, the character of the student may also experience change during a year of college. The existence of an honor code, church organization, and student government found in most colleges and universities can influence the development or reformation of a student's personality to a large degree. An honor code is a system whereby each student acts as his own policeman with regard to cheating and other dishonest acts while at school. If a student makes some

(Continued on page four)

Post Holiday Thought

The holidays have passed. Everyone has gone back to school. The town seems so empty now. A few bare Christmas decorations hang here and there. Everything seems to have lost its color in a way. Not long ago you were looking forward to all the gaiety of the festive season. There were old friends you hadn't seen in such a long time. Each day there was something new to do, something to look forward to.

Time passed. You unwrapped all those bright packages and tore open all those cheery cards. You shopped and took extra care to get something exactly right for that special someone. And then Christmas was gone. But it would come again. Anyway you were ready for New Year's Eve. But even that had to end. Everybody you were dying to see left town again.

Nineteen hundred and fifty seven. Now that it's here what are we going to do with it. '56 is gone forever. In a way you feel like there's nothing left to do but try to keep all those grand resolutions you made (or did you?) Really it would be a good idea, but it's so hard; saving your money, studying when you're supposed to, and a few other things you promised yourself you'd start or quit.

When you daydream you get absolutely nothing accomplished—but it's so much less tiring. Too much work exhausts the brain you say.

Or maybe you're satisfied with the way you did things last year. Perhaps you were proud of everything you did.

Whatever your feelings, it's a fresh new year. Let's all cure ourselves of that comfortable malady of satisfied inertia and live it up. A great deal can be done when we set our minds to it. After all, the '57 models are out now. So why be an old out-dated wreck. Old dogs can learn new tricks you know.

METRONOME

John R. Hopkins

Numbered among the new recordings purchased by the Armstrong Library, with the aid of Mrs. Lubs and Mr. Killorin, is a contemporary Cantata by Carl Orff entitled CATULLI CARMINA. This is an exceptional Vox recording with superb interpretation by the artists. This is the first and only notable recording of this new work which was composed in 1943.

The Cantata is based on ancient love poems of Catullus, and the composer has included in the score, music to arouse man's every passion. Once one starts to listen to this recording, the magnanimous explosiveness of the music refuses to let him go.

The piece is scored for four pianos and percussion instruments of every kind, which bring out Orff's deliberate return to a kind of musical primitivism perfectly.

Facts about Orff's life and about the story of this Cantata can be found on the record cover, however, we know that he was born in 1895 in Munich, and that among his compositions are CARMINA BURANA (1936), CATULLI CARMINA (1943), and THE TRIUMPH OF APHRODITE (1953). Actually, all of these pieces form a trilogy telling a beautiful love story.

This is one piece of music that devoted followers of the classics hold in high esteem, and classics haters admit that they've never heard anything quite like it. This is one recording that even you would like if you hate Beethoven and Tchaikovsky.

THE INKWELL NEEDS YOU

In the future, we would be glad to devote as much space as is necessary to articles written by the student body. If you can write, hand in to the Publication office what you would like us to publish. This includes news articles, short stories, and anything we consider printable.

Cupid's Corner

Cupid was really busy during the holidays!

Only one wedding took place, which was held on December 23. Bobbie Jean Walker became Mrs. Robert Cauthard in a beautiful ceremony at Cokesbury Methodist Church.

Among some of the girls who got rings was the associate editor of the "Geechee," our annual, Dottie Baxley. Dottie got her ring from Tommy Davis on Christmas Day. It's very pretty, Dottie!

Barbara Pounder, a very active member of the Newman club, received her ring from Cliff Heim, a few days after Christmas.

Being vice-president of the Sophomore class and president of the Math club, everyone's aware that Freddie Drexel has "lefthanditis." Roddy Lee, whom all the upperclassmen remember, is the lucky guy.

We understand that Carolyn Van Barckle received her ring from Jimmy Hart, a former Armstrong student.

Julia Brannen and Colon Anderson, two popular Armstrong graduates, were also recently married.

We would also like to know about any other engagements or marriages among our students in the future so that the Inkwell can give them recognition.

-Notice-

All Student Senate representatives are reminded to have their respective clubs elect a sponsor for the Valentine Dance. The elections must be held before Friday, January 26. This is very important, since the Valentine Queen is also the Geechee Beauty Queen for 1957. The dance will be held some time in February.

Senate representatives are also reminded to notify the people whose names are given on the lists distributed at the last meeting. These people are in turn urged to co-operate with their representatives so that progress may be made toward construction of the new science building. This matter will be more fully discussed in the next issue of the Inkwell.

Library News

Among the new faculty members this year at Armstrong, we have a new librarian, Mrs. Muriel McCall. Mrs. McCall is not exactly a new member since she was the librarian here at Armstrong from 1952 until 1954.

Mrs. McCall is a graduate of Tallahassee State College for Women and also the University of Georgia. While attending college, she was a member of many various societies. Among them were the following:

Phi Alpha Thata	History
Sigma Delti Pi	Spanish
Kappa Delti Pi	Education
Phi Kappa Phi	General Education
Phi Beta Kappa	General Education

Mrs. McCall has also been employed by Emory University, where she was a supervising teacher for the education majors. She is a member of the Bull Street Baptist Church and is president of the Women's Missionary Union.

Mrs. McCall's home is located on Wilmington Island where the family enjoys boating and swimming. Reading and traveling are enjoyed by our librarian but what she has enjoyed most and has taken up her time with lately has been her little five year old girl, Marybeth.

I would like to join the faculty and the student body in bidding you welcome once again, Mrs. McCall. We are certainly happy and fortunate to have such a capable person as you to be one of our family here at Armstrong.

Dean's List Announced

Miss Lorraine Anchors, Registrar, announces the Dean's list for the past quarter. This list includes the names of those students taking a normal load who make a grade of "B" or better in each course. The students are as follows:

Faye Anderson, Henry C. Armstrong, Hudson E. Ayers, Sylvia Barfield, Billy B. Beasley, David P. Becker, Patricia Beiser, Robert H. Best, Jr., Barbara Jean Burke, Catherine L. Cetti, Rose Cordray, Sara Irma Davis, Freddie A. Drexel, Harris Edwards, Robert E. Epps, Judith Ann Eure, Julia E. Fraker, Gail Patricia Garwes, Carol L. Glasscock, J. B. Goff, Pauline Gooley, Roderick L. Guerry, Jr., Gaye L. Hope, Stephen Hornstein, Richard C. Howard, Robert Joiner, Sandra Kay Knight, Joyce Krenson, Lorna Lapp, Frederick Lubs, Suzanne Malone, Margaret Miller, Anne Mills, Gerald Mueller, Linda Nease, Betty O'Donnell, Ann Brown Ross, Gerald Sands, Harriett Sapp, Janice Sapp, Arnold Sims, William A. Smith, Connie Tunstall, Bobbie Jean Walker, Ann Youngblood and John Hopkins.

The Inkwell Salutes . . .

In the publication of the Inkwell we wish to salute Mr. Joseph Killoirin, teacher at Armstrong. Mr. Killoirin, one of the most versatile men we know, graduated from Benedictine in Savannah, holds an A.B. degree from St. John's University, and an M.A. from Columbia. At St. John's he was student director of the "King William Players," the dramatic group there.

Mr. Killorin is an accomplished actor and director. He has played a leading role in the pageant "Unto These Hills" in Cherokee, North Carolina during past summers. He has been the director of the Little Theater in Savannah for the past several years. During that time he has been largely responsible for the many fine productions put on by that group, which is, as we understand, one of the finest Little Theaters in the country. He has acted in some of them himself.

Mr. Killorin is a real connoisseur of records and of classical music. A musician himself, he has a wonderful collection of LP's at his house. However, he began collecting records long before the long playing 33's came into style. He is, with his long experience and wonderful memory, an expert on the subject.

At the age of twenty-one, Mr. Killorin came to Armstrong to teach. Today he teaches history, political science, and has a course in poetry. Our reason for saluting him is his contribution to the students here at Armstrong. He has inspired many of us through the year, and will, we hope, inspire many others in the years to come.

PERSONAL, SOCIAL GROWTH . . .

(Continued from page two)

breach of the code or proves unworthiness of such trust, he can be instantly dismissed, often with the approval of such dismissal by the other students. This encourages all students to use their better judgment at all times on the campus and possibly in later life.

In like manner, the student government usually stressed in higher institutions gives the students a close-hand view of democracy in action. The student is often encouraged to take part in such activities for his own welfare and for the invaluable experiences they provide.

Another side product of the student's higher education is a mastery of time. By mastery of time is meant the ability to apply himself in such a way that he can socialize, study, and make the necessary reports. Once the student learns to balance work with play he is well on the road to success in college. This correct use of time by the college student may influence him toward moderation in his later life. It is a means through which a young person may learn the value of concentration on the work at hand and a greater appreciation and use of his leisure time. It teaches him the importance of meeting deadlines and following schedules.

A mastery of time requires good judgment and a certain amount of forethought the rewards of which need not be described. The self knowledge, growth of character, and mastery of time learned in college all add to the personal growth of the individual and are of great value throughout a person's life.

The Armstrong Geechees open the winter quarter portion of their basketball schedule January 5 in Chamblee, Ga., with Southern Tech. furnishing the opposition. The Geechees then journey to the metropolis of Ludowici, Ga., to be the guests of a strong Brewton Parker quint. This game is to be the feature attraction of Ludowici's celebration honoring Gene Wells, a member of the Brewton Parker squad. "Turkey" as he is affectionately referred to by his most intimate friends is the leading scorer and defensive whiz of the powerful Barons.

In their last meeting the Geechees gave the Barons quite a go round for the first half, trailing by only seven points at the intermission, but gave way to the speed and height of the visitors to come out on the short end by some thirty points.

The Geechees make their first local appearance of the winter quarter on January 11, entertaining Chipola Call. of Marriana, Fla. The following night the Geechees play host to the Norman Park "Roadrunners" of Norman Park, Ga.

Chipola is making its first appearance on the local scene but from advance notices will floor a tall, fast team.

It is to be noted at this time that

Math Club Holds Party

At the last meeting of the Armstrong Math Club, the members were entertained by the showing of a movie, "Geometry in Action" and a social period in which refreshments were served. A field trip is being planned to a local factory sometime in January. It was announced by the club president that the math and science clubs may be forced to merge into one larger club. The small attendance at the club meetings has been very discouraging, and it would really be a shame for them to fold up. You are urged to take part in these carefully planned meetings and will profit greatly by doing so.

Another year--and didn't that first quarter fly? Take it from me; the next two go twice as fast. Before we realize it, this year will be over. There will be nothing we can do about it. We can only look back on our experiences and say, "remember when . . .?", "It seems like only yesterday." Whether we have happy memories or thoughts that we're thankful are only memories is up to us individually. Not only scholastically, though it would be nice to look back over a successful "grade year"; but in respect to our every-day lives. We want to remember the things we do with each other.

This means so much. Each year we're here is marked by events and experiences that we enjoy with one set of people. We won't have the same classmates next year. Only some of them will return. Therefore, we must live each day to its fullest. Take advantage of the opportunity to enjoy life here with your friends. Don't sit idle. Instead of "Don't put off until tomorrow what you can do today" or "Don't do today what you can put off until tomorrow," let's do something with every day. Happy living and Happy New Year!

the Geechees will sorely miss the services of Jimmy Harritos, who is not in school this quarter. Jimmy gave the Geechees much help in the scoring dept. besides being a splendid floor man.

Three of the Geechees have given some fine training for local doctors with cuts and bruises sustained in the line of duty. Mouse Adams, the fine co-captain, almost added Jimmy Harritos to the injury list by biting him on the shoulder during a collision in the Brewton Parker game.
